
ABOUT ME

AWS DevOps Engineer with 7+ years of experience specializing in AWS cloud infrastructure, Linux administration, and DevOps automation. Proven track record in optimizing cloud environments, enhancing CI/CD pipelines, and ensuring high availability through scalable and reliable infrastructure management using DevOps tools..

WORK EXPERIENCE

Capgemini Technology Services India Limited

Mar 2023 – Present

- Created and managed AWS EC2 instances, S3 buckets, IAM users, roles, and policies, VPC subnets, security groups, and route tables from scratch to support platform operations.
- Deployed applications across development, staging, and production environments using Jenkins CI/CD pipelines; configured pipeline stages including build, test, and deployment.
- Provisioned new cloud environments end-to-end using Terraform; wrote and maintained Terraform modules for reusable, consistent infrastructure creation across accounts.
- Created EC2 Launch Templates and Auto Scaling configurations for new application workload; set up ALB target groups and listener rules for traffic routing.
- Enforced least-privilege security by configuring IAM roles, service principals, secret scopes and access governance policies in compliance with security standards.
- Performed L2/L3 incident support and root cause analysis for production issues, improving overall system reliability by 30% and ensuring SLA compliance.
- Managed service principal (SPN) lifecycle, credential rotation, and access governance across multiple environments.
- Monitored infrastructure health and performance using AWS CloudWatch; created alarms dashboards, and log metric filters to proactively detect and resolve issues.
- Collaborated with development and engineering teams to coordinate production releases and streamline deployment workflows.

TeamLease

Sep 2018 – Mar 2023

- Managed and scaled AWS cloud infrastructure using Docker containerization to ensure high availability of mission-critical applications.
- Designed and configured VPCs, Security Groups, Route 53 DNS, and Application Load Balancers (ALB) to optimize network performance and fault tolerance.
- Ability to deploy the build scripts and automated solutions using scripting languages Shell Scripting (Bash)
- Experience in Designing, Installing and Implementing Ansible configuration management system and in writing playbooks for Ansible and deploying applications.
- Configured AWS Lambda functions to use Docker container images as the runtime.

EDUCATION

Bachelor of Engineering - Computer Science

- Solapur University.

TECHNICAL EXPERTISE

- **Cloud:** AWS (EC2, S3, IAM, VPC, Route 53, ALB, Auto Scaling Groups, Security Groups, CloudWatch, CloudTrail, Systems Manager, EC2 Launch Templates, ECS, EKS), Microsoft Azure
- **Data Platforms:** Databricks, Apache Spark. .
- **DevOps Tools:** Ansible, Jenkins, GitHub Actions, Azure DevOps, Terraform,.
- **OS:** Linux (Ubuntu, RHEL), Windows.
- **Monitoring Tool:** AWS CloudWatch, AWS CloudTrail

CERTIFICATIONS AND ACHIEVEMENTS

- **Certifications:** AWS Certified DevOps Engineer – Professional
- **Achievements:** Recognized with Rockstar Award for excellent performance.
